About GroomLMS

Features at a glance

Advanced reporting & Analytics

GroomLMS offers step-by-step tracking of user engagements, enabling detailed analytics on learning progress of users

Gamification

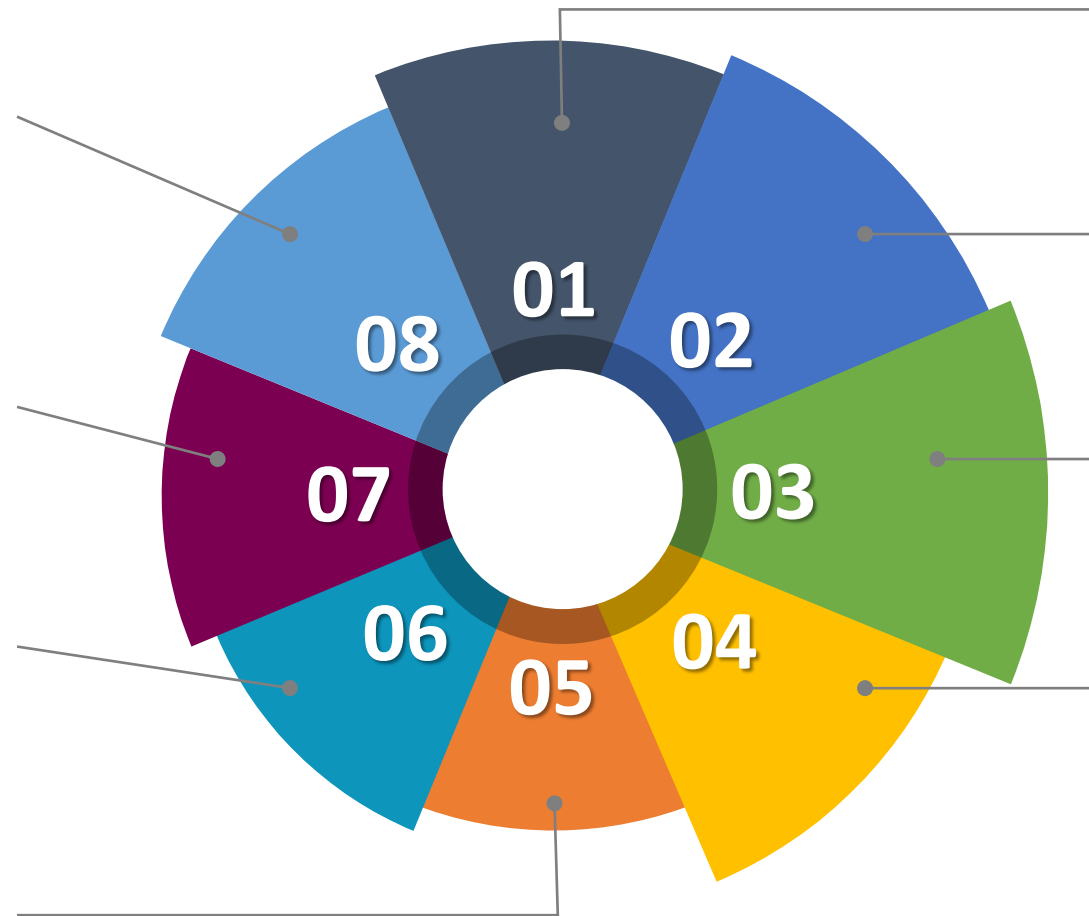

We create powerful content with the help of activity based learning, point systems, leaderboards, badges, social media integrations etc.

Learning journeys

GroomLMS enables the creation of personalized learning journeys for individuals or groups, empowering learners to systematically enhance their skills.

E-commerce & API enabled

GroomLMS is fully e-commerce enabled with thousands of ready integrations available via Zapier like MS Teams, Zoom, Google, CRMs etc.

Fully customizable

One size doesn't fit all. We understand this fully and thus deliver our solutions tailor made to every client's needs, starting from the UI, content, branding to reporting and white labeling.

Cloud based & Secured

GroomLMS is cloud based and is hosted on AWS India, and is SSL secured certifications and two-step login authentication procedures.

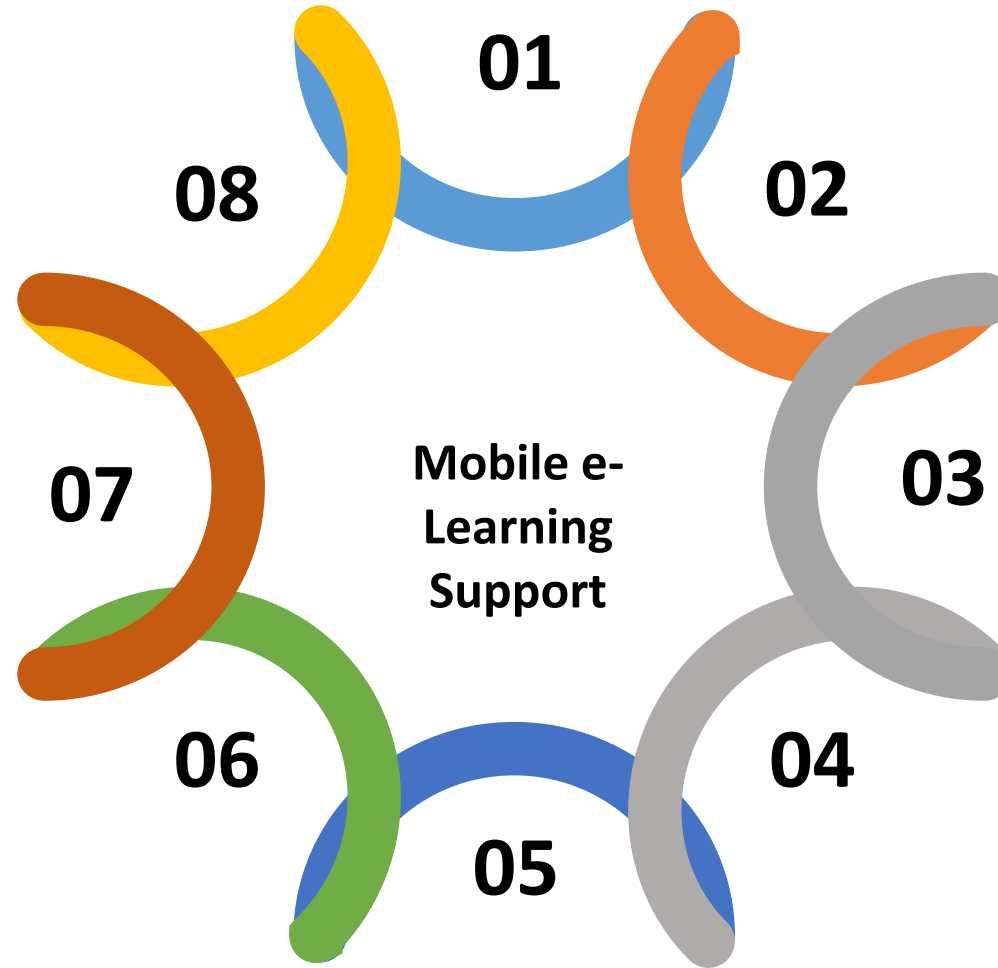

Multilingual platform

GroomLMS supports 100+ languages globally and we also support 10+ Indian vernacular languages for better learner engagement

Course Libraries + Content Authoring

GroomLMS can be easily integrated with several third party course libraries as per the needs of your organization. Need custom content? No problem! GroomLMS comes with easy content authoring tools for creation of content using AI.
